COSI Comes to TRC

Jason Holmes, Project Engineer at TRC Inc.'s Emissions Laboratory, was recently interviewed on film in preparation for the opening of The Innovation Showcase at The Center of Science and Industry Museum (COSI) located in Columbus, Ohio. The Innovation Showcase is a 1,500 square foot exhibit that will be open from August 2011 through December 2012, presenting information about energy. A section of The Innovation Showcase focuses on careers in the energy field. COSI wants viewers to realize that the need for innovation in this sector of our economy creates the opportunity for many types of jobs and careers. The target audience is students in middle school and high school. It is COSI's hope to get students interested in this field by showcasing a variety of education levels that represent varying interests.

7th Annual Injury Biomechanics Symposium

The Ohio State University (Ohio State), in conjunction with Transportation Research Center Inc. (TRC Inc.), hosted the 7th Annual Injury Biomechanics Symposium this past May. The student-centered symposium continues to be an important industry/academia event intended to stimulate and reward injury biomechanics research among students and recent graduates.

Seatbelt & Car Seat Safety

The TRC Inc. Community Relations Committee, as well as the Vince and Larry crash dummies, joined the Southeastern Elementary School's annual health fair on March 25, 2011 in an effort to promote seatbelt and booster seat safety. The first grade students had the opportunity to meet Vince and Larry and take a class picture with them. They also met a real crash dummy that was representative of their size and age. Other activities included a short story, a question-and-answer session, and a chance for each student to sit in a booster seat and learn the proper mechanics of the booster seat and seatbelt. Students from the Bellefontaine High School volunteered to dress up in the Vince and Larry costumes for the health fair.

SAE Commercial Vehicle Engineering Congress

The SAE Commercial Vehicle Engineering Congress will be held September 13-14, 2011 in Rosemont, Illinois. The event will focus on the essential on and off-road technologies, including technical sessions that present the newest developments and technology tools, networking events to facilitate communication, support, and an environment for cooperation and discussion.

Directions in Engine-Efficiency & Emissions Research Conference

The 17th Directions in Engine-Efficiency and Emissions Research (DEER) Conference will be held from October 3-6, 2011, in Detroit, Michigan. The conference is the Department of Energy's (DOE's) primary mechanism for the public exchange of state-of-the-art advanced combustion engine research and development.
